

Elevate Labs Task 5

1) Install Wireshark

I haven't install Wireshark because it is an pre-installed tool in Kali Linux

2) Capturing active network

To capture an active network I have selected my eth0 interface on which I generate traffic

3) Browsed an website to generate traffic

The website which I have browsed is kali.org to generate traffic on my active network

4) Captures packets by protocol
